Summary

I am a results-driven Laravel Developer with 10 months of hands-on experience in building scalable web applications and systems. Skilled in backend development and database management, I deliver efficient, modular, and client-focused solutions. My ability to tackle problems with a strong mindset ensures optimal application performance.

Work Experience

Gosotek - Software Developer Oct 2025 - present

Currently working at Gosotek as a Software Developer on a FinTech Loan Aggregator platform. I develop web and mobile applications using Laravel, Flutter, HTML, CSS, JavaScript, and WordPress. I have contributed to building Customer, Agent, and Admin panels, along with mobile apps supporting loan applications, KYC processing, lead management, and loan tracking. I also integrate partner bank APIs and optimize backend APIs and databases to ensure secure and scalable system performance, while leveraging AI developer tools such as Trae, Claude, and RooCode to improve development speed, debugging, and code quality.

Sun Shine IT Solution Oct 2024 - Oct 2025

Worked as a Laravel Developer, where I contribute to designing and developing scalable web applications. My responsibilities include building and integrating RESTful APIs, implementing role-based access control, and developing invoice and billing modules with complex backend logic. I manage module-wise development (products, sales, purchases, reports), optimize relational databases, and ensure smooth backend operations. I also collaborate with the team on feature enhancements, bug fixing, and client-requested customizations to deliver efficient IT solutions.

Heoweb Solution July 2024 - Sep 2024

Worked as a Trainee Software Developer, where I assisted in the development, testing, and maintenance of web applications. Collaborated with the team to design and implement new features, gaining hands-on experience in software development practices and database management.

Projects

Nandafincap – Loan Aggregator Platform Link to Demo

Built a Loan Aggregator platform for Nandafincap featuring Customer, Agent, and Admin panels and mobile applications. Implemented KYC workflows, lead management, partner bank integrations, and loan tracking using Laravel, Flutter, and modern web technologies.

Osoeasy Laundry Management System Link to Demo

Developed a web-based application to streamline laundry service operations, including order placement, tracking, and billing. Implemented role-based access for admin and users, integrated invoice generation, and optimized database management for smooth backend operations. Designed user-friendly interfaces and ensured scalability for handling multiple service branches.

EzyClean Laundry Management System Link to Demo

Built a web application to manage laundry services, covering customer orders, service tracking, and automated billing. Designed separate dashboards for admin and users, integrated role-based access, and optimized database operations to ensure smooth workflow and efficiency.

integrity Laundry Management System Link to Demo

Contributed to the UI/UX design of the application, focusing on creating user-friendly layouts and responsive interfaces to enhance the overall customer experience.

Job Portal System Github Link

Developed a job portal web application where recruiters can post jobs and seekers can apply with uploaded resumes. Integrated email notifications to inform seekers about job application status (accepted/rejected). Designed separate dashboards for recruiters and seekers, with graphical representation of job statistics for better user insights.

Event Booking System Github Link

Developed a web-based platform where admins can create and manage events, and users can register/login to book events. Integrated features for users to view their booked events and receive email confirmations. Admin can track user activities and monitor event bookings through a dedicated dashboard, ensuring efficient event management.

Education

2021 - 2024	Bachelor's Degree at **SISTec**	(CGPA: 8.75)
2020	Class 12th CBSE Board	(Percentage: 65)
2018	Class 10th CBSE Board	(Percentage: 69)

Skills

Programming Languages	PHP, HTML, CSS, SQL
Frameworks	Laravel
Databases	MySQL
Web Technologies	Bootstrap, RESTful APIs
Tools	Postman
Other Skills	Object-Oriented Programming (OOP), API Integration, Problem Solving, Team Collaboration
